

Mid-market Solutions

The Internet Transaction Exchange for Small and Mid-market Suppliers

DIcentral offers a hosted integration platform that enables small and mid-market suppliers to electronically transact with traditional buyers and new e-marketplaces. DIcentral solutions enable customers with internal enterprise applications such as XML-enabled procurement solutions or EDI to be connected seamlessly with their external Business Partners, regardless of what file formats that they require.

Benefits

With DIcentral solutions our customers will conduct business electronically with more Business Partners. Additional benefits enable our customers to:

- *achieve true any-to-any integration across multiple systems, file formats, and document types*
- *participate fully in e-markets of choice without the need for unique integration software*
- *bring together the electronic trading requirements of your larger Business Partners*
- *rival larger, more established suppliers in your industry who are already taking advantage of the benefits of e-procurement*
- *diminish procurement time, allowing you to get paid in a more timely manner*
- *reduce annual outlay of e-business costs, including staffing, software and value-added network (VAN) fees*

Service Highlights

Our solutions offer small or mid-market suppliers a hosted software service featuring:

- *access an end-to-end Data Exchange solution with a single link to DIcentral*
- *no additional hardware required*
- *no large up front investment compared to the traditional EDI/XML solutions*
- *transaction-based fees that make costs manageable*
- *monitored and completely secured transactions*
- *world-class, secured, fault-tolerant computing environment*
- *data can be viewed and printed from the browser before being imported into an application*
- *support for all types of transactions and file formats, such as:*
